

FERTIMIXER

**Petrol driven mixer
for mixing and storing soluble fertilisers**

- 1350 litre capacity
- Mix rate of 600lt/min
Will mix large quantity of soluble fertiliser at one time
- Can be used as a store for mixes rather than leaving in sprayer overnight.

Pump can also be used to pump out any flooded areas on golf course.

- All connections on quick release cam lock system
- Can be stationary or mobile on a trailer
- Health and safety compliant
- Developed because of demand from greenkeepers to find an easier solution to mix solubles.

- Huge time and labour saving which is all important when there are weather or traffic time constraints
- Will allow more specific fertiliser mixes
- Will save money versus buying low concentrate liquid fertilisers
- Will save on transport and packaging.
- Guaranteed Irish
